

Up-And-Over Garage Doors

Europe's best-selling garage door

Exclusive door aesthetics

With style 905, you can create a garage front to fit your own ideas and personal architectural style. A steel frame construction for on-site infill is a solid technical basis to build on. You can pick an infill to fit your individual style. This way you can incorporate your garage door harmoniously into the overall look of your home's facade.

Styles 902 and 905 also come with a practical wicket door that provides you with good access to everything in the garage, without the need to open the entire door.

◀ Style 905 with on-site infill

◀ Style 902 Window grey RAL 7040 with wicket door

▼ Style 914 Traffic white RAL 9016

Colours and surfaces to choose

Steel doors with coloured polyester primer powder-coating. The galvanized door leaves are optimally protected against adverse effects of the weather and corrosion right up to the cut edges. Our steel styles are available in inexpensive Traffic white as standard, in 7 equally-priced preferred colours, as well as about 200 colours based on RAL.

Collective garage doors

Up-and-over doors are also suitable for the secure locking of parking spaces in collective garages. The ventilation slots (approx. 30% of the door surface) ensure optimal ventilation.

Steel doors

Traffic white RAL 9016, 7 preferred colours, RAL to choose	•		•
Wicket door and side door available	•	•	
Ideal for underground and collective garages			•
Max. width (mm)	5000	5000	5000
Max. height (mm)	2750	2750	2750

1 Protection against trapping

Flexible plastic rails between the door leaf and frame (no steel on steel), as well as additional protective caps over the lever arms, ensure effective protection against trapping.

Hörmann patent

2 Multiple spring safety system

If one of the springs breaks, the other intact springs support the door. The distance between the spring windings is so minimal that even children's fingers are protected from getting caught.

3 Comfortable closing

Due to the specially shaped lever arm the door pulls itself shut when closing.

4 Break-in-resistant due to a unique rotary catch lock

With this type of lock, the door leaf corners are fixed firmly to the frame, making forced opening practically impossible. You can additionally equip the door with top locking using an easy-to-fit retrofit kit.

Hörmann patent

Overall length with operator (GLA)
 3200 mm up to door height 2500 mm ProMatic / SupraMatic
 3450 mm up to door height 2750 mm ProMatic / SupraMatic

Special sizes and versions on request max. size range (BR): 1250 × 2375 mm.

Standard sizes with steel infill and on-site infill doors are supplied for external fitting as standard. Internal fitting is possible by reversing the hinges. Styles with timber infill overlapping the frame are only possible with external fitting.

Block frame for fitting in the opening: dimensions and versions on request.

Explanations

Ordering sizes

BRB	Nominal size width
BRH	Nominal size height
LMB	Structural opening width
LMH	Structural opening height
RAM B	Overall frame dimension width
RAM H	Overall frame dimension height
LDB	Clear passage width
LDH	Clear passage height

The clear passage width is reduced if the opening angle is less than 180°.

FFL	Finished floor level
RSL	Rain canopy
SF	Fixed leaf
GF	Traffic leaf

Please note:

* LDH without threshold + 15 mm

Size range for double-leaf side doors

Width (BRB) 1300 to 2500 mm

Height (BRH) 1750 to 2250 mm

Block frame for fitting in the opening: dimensions and versions on request.

As standard delivered for external fitting, traffic leaf on right hand side, state on order if internal fitting or traffic leaf on left hand side is required!

Fitting variants

External fitting opening outwards

Single-leaf

Left-hand hinged Right-hand hinged

Double-leaf

Traffic leaf left-hand hinged Traffic leaf right-hand hinged

Internal fitting opening inwards

Single-leaf

Left-hand hinged Right-hand hinged

Double-leaf

Traffic leaf left-hand hinged Traffic leaf right-hand hinged

With doors fitted on the inside, the threshold angle or transport angle must always be removed and a water run-off to the outside must be provided. Doors on the weather side are preferably fitted externally.
